Projects

Level 7

laravel

This project involves ready-made and custom-tailored clothing, and it offers rental services to companies. There are various packages available. The project encompasses warehouses, production, and sales. It supports multiple warehouses and is developed using PHP (Laravel), JavaScript, and jQuery. Currently, the project is in its final stages of implementation SAAS MODEL.

Chc

laravel and flutter

This project allows doctors to enter patient information, examination details, prescribed medications, required tests, and radiology requests. Patients can use their unique identifiers to obtain prescribed medications from pharmacies and access required tests and radiology services through the application. Additionally, patients can view all their medical records and details Saas model.

Sokelasr

laravel and flutter

Developed an e-commerce platform named "Sokelasr" that supports multiple vendors. The platform includes comprehensive dashboards for both admin and vendors, enabling efficient management of products, orders, and sales.

سلفنى

laravel and flutter

Responsible for the project dashboard and application. This project allows users to apply for loans, which are then approved by an admin. Loan installments are calculated based on the number of months with interest, and there is a calculator for loan computations. The project includes verification of ID card images (front and back).ect

fullmarkwork

laravel

This project offers various services, each with additional options that users can purchase. It includes a chat feature with admin monitoring from the dashboard. Users can register as either sellers or buyers. Sellers are granted access after admin approval. The platform also allows for the acceptance or removal of services through the admin dashboard and etc.

Newsiworld

laravel

Developed a platform for renting news sections, managed through an admin dashboard. Admins can create and manage advertisement sections, which users can choose and add to their platforms. Integrated with ChatGPT for reviewing, organizing, and correcting posts. The platform also pulls articles from other sources and includes a keyword filter. The admin dashboard allows control over which platforms receive these additions.

Mobileworld [↗](#)

laravel and flutter

Developed an e-commerce platform named "mobileworld" that supports multiple vendors. The platform includes comprehensive dashboards for both admin and vendors, enabling efficient management of products, orders, and sales.

Purelife [↗](#)

laravel and flutter

Designed and developed "purelife," an e-commerce platform supporting multiple vendors. Implemented comprehensive dashboards for both administrators and vendors, facilitating efficient management of products, orders, sales, and service ordering.

step by steb [↗](#)

Codeigniter

Developed an e-learning platform with an e-commerce feature. Students can purchase complete courses, individual lessons, or specific units from the curriculum.

zshop [↗](#)

laravel and flutter

Created "https://zshop-eg.com/," an e-commerce platform supporting multiple vendors. Implemented comprehensive dashboards for administrators and vendors, facilitating efficient management of products, orders, and sales. Additionally, users can view and purchase used products.

Math [↗](#)

laravel and flutter

Developed an educational platform allowing teachers to add lessons and access exam results, attendance, and absences.
